WORD FROM THE FOUNDER

Some overseas institutes are based on ideas that every child is a miracle and work is a call from God. To these ideas are added certain influences from the United States for the more creationist of them. There the state imposes on them respect for the academic obligation of public order, good morals and pedagogical control. Their room for maneuver remains wide. A freedom which they are not close to fulfilling as stated by Luc Bussi re, President of the Association des Etablissements Scolaires Protestants Evangeliques Francophone (AESPEF): " nder contract, we must make a clear cut between the classical subjects and faith, while for us, our region breathes everywhere." In Cameroon, we are not so far apart because each authorized IPES is subject to the obligation to respect the ministerial program. Only this ministry, worried about a relative insufficiency, speaks of the minimum of the program taking the secularism of our country into account.

The Evangelical Higher Institute of Applied Technologies and Management (ISETAG), beyond the classical teachings, will be added to new subjects including teachings on the Bible. Besides Albert Einstein affirms that "science without religion is lame, religion without science is blind" and we share this opinion. This marks the problematic R do science and religion have a relationship? If so, what is the nature of this link. Does science eliminate the possibility of believing in a divine being or, the contrary, does it bear witness to it? Moreover, does not religion, as stamped with the leap of belief, allow science to fall into dogmatism? In short, we should ask ourselves what benefit can science in a divine being or, the contrary, does it bear witness to it? Moreover does not religion, as stamped with the leap of belief, allow science to fall into dogmatism? In short, we should ask ourselves what benefit can science derive from religion and, conversely, religion from science.

In any case, when it comes to innovation in higher education in Cameroon, this is where our scientific added value lies. Our goals will only be achieved with the help of all educational entities, that is to say, learners, parents, school, partners and the state: A symbiosis is required. And since we want to go far, we are counting on all the components mentioned here. Welcome to ISETAG.

PAMEN FLAUBERT

MANAGEMENT AND BUSINESS STUDIES

MANAGEMENT

- Assistant Manager (AM)
- Human Resource Management (HRM)
- Logistics and transport Management (LTM)
- Port Shipping Management

BUSINESS AND FINANCE

- Accountancy (ACC)
- BANKING AND FINANCE (BKF)
- MARKETING
- Trade -Sale (MTS)

INFORMATION AND COMMUNICATION TECHNOLOGY

- COMPUTER ENGINEERING
 - Software Engineering
 - Hardware Maintenance
- NETWORK TELECOMMUNICATION
 - Telecommunication

ENGINEERING AND TECHNOLOGY

PETROLEUM AND MINING ENGINEERING

- Drilling Technology
- Petroleum Systems and Exploitation

CIVIL ENGINEERING

- Civil Engineering Technology
- Wood Works
- Urban Planning

ELECTRICAL AND ELECTRONIC ENGINEERING

- Electrical Power System

MECHANICAL ENGINEERING

- Mechanical Manufacturing
- Mechanical Construction

ADMISSION TO ISETAG IS DONE EXCLUSIVELY BY ENTRANCE EXAMINATION

- Handwritten application addressed to the head of institution, specifying the chosen speciality
- Pre-registration form issued by the school
- photocopy of birth certificate
- Photocopy of the A/Level certificate
- 04 passport size photographs

N.B: By choosing to register at ISETAG for the 2022/2023 academic year
 - You have the possibility to benefit a scholarship ranging from 30,000 to 200,000 FCFA offered by our partners
 - you can also enjoy our well furnished modern rooms with wifi and potable water at unbeatable prices

The first 100 students to enroll will obtain a **40%** discount

10 GOOD REASONS TO ENROLL IN ISETAG

- 1- Project management and financing
- 2- High speed internet access;
- 3- Availability of a minibus for students;
- 4- Availability of students hostel;
- 5- online courses with business expectations;
- 6- Practical approach and interactivity of the training;
- 7- Highly qualified and experienced teaching staff, Senior executives; business leaders;
- 8- Good Infrastructures respecting HSE standards;
- 9- Planning and respect of the academic calendar;
- 10- Organization of professionalization seminars.

TRAINING OFFERED

Our diplomas: HND Higher National Diploma
 Required level: GCE, A/L
 Duration of training: 02 years sanctioned
 With a diploma issued by the ministry of higher education

Department of Marine and Port Sciences

Under the academic supervision of the University of Douala, Shanghai Ocean University of China, Regional Maritime University of Ghana, University of EBOLOWA (ENSTMO of Kribi)

100% Professional integration

Training in the PORT AND MARITIME field

Become a maritime navigator, naval electromechanical engineer, marine and port safety and security expert, fisheries data analyst, aquaculture engineer, maritime and port admiral

DURATION OF TRAINING AND DIPLOMAS OBTAINED

1. Duration of training 04 years

Training in Cameroon and China or Ghana depending on the chosen sector

2. Diplomas obtained

double degree
 (Professional license) and international STCW 95 certification.

COMPILING THE FILE

- Photocopy of the proof or GCE OL
- Photocopy of Baccalaureate or GCE AL
- Medical certificate dated less than 3 months
- 02 Photos 4X4
- ID photocopy
- Photocopy Birth certificate

ADMISSION REQUIREMENTS

- Required level: Baccalaureate all mixed series
- Admission by competitive examination/ file study. Fees: 10,000 F CFA

TRAINING BENEFITS

- Free English and Chinese lessons
- Uniformes (K pi + veste) offerts
- Courses available to all.

NB: University accommodation available for the duration of the academic year (equ + light + WiFi included)
